## CIRCULAR LETTER

Listed B3 Participants

Re: **Co-location – New Access Mode to the Certification Environment**

Seeking efficiency, a reduced operating cost when accessing B3's infrastructure, and meeting market demand, B3 hereby informs you of the availability, from **June 27, 2024**, of the new access mode to the certification environment via Co-location: Cross Connection in UTP 1GB.

For the implementation of the new mode, B3 will provide:

- Cross Connection in UTP 1GB for access to the certification environment.
- Exclusive IP range for certification.

Please note that:

- B3 recommends that the segregation of access to production and certification environments should occur on separate servers, to avoid order entry at wrong environments.
- There are differences between the environments, namely: gateways, different IPs, trading accounts, SecurityID and different trading session passwords.
- The price table and the description of the commercial aspects for accessing the certification environment via Co-location Cross Connection are available in the B3 Co-location Services Commercial Policy, at [www.b3.com.br/en\\_us/Solutions, Hosting & Colocation, Data Center, Co-location Services, Co-](http://www.b3.com.br/en_us/Solutions,Hosting&Colocation,DataCenter,Co-locationServices,Co-)
