EXTERNAL COMMUNICATION

Listed B3 Participants

Re.: **FIX and Binary Entrypoint – Order Entry Interface: Technical Specifications Update for Midpoint Order New Functionality**

B3 hereby informs you that new functionality will be implemented for Midpoint orders. This will enable order entry and, consequently, execution of trades that are not necessarily multiples of the minimum size of a determined instrument. Only the minimum and maximum quantities of the instrument will be recognized. This procedure is part of the continuous enhancement program for trading systems and seeks to anticipate the planning of market participants for the launch of functionality and products.

This functionality, whose implementation is subject to approval from the regulator, will have a new mechanism: in the case of a partial execution that leaves an amount remaining from the order that is smaller than the minimum size for the block, the residual volume will be cancelled. This will facilitate the trading and usability of the Midpoint order, maximizing its potential for use.

Binary Entrypoint and FIX Entrypoint Specification – Order Entry

The order entry gateways – binary and FIX – will have the following changes to the domains in reference to tag 378-ExecRestatementReason:

013/2025-VNC

- The domain for “**Cancel on Midpoint Broker Only Removal**” will go from “209” to “213”.
- The “209” domain will become “**Cancel Minimum Quantity Block**”.

The EntryPoint technical specifications are available at www.b3.com.br/en_us/, Solutions, Platforms, PUMA Trading System, Developers and vendors, EntryPoint, FIX Order Entry and Binary Order Entry.

Update timetable

The dates for provision in the certification environments and for the go-live stages will be available at <https://clientes.b3.com.br/en/>, Posts, News, Highlighted News, B3 Tech Launches | Trading, Entrypoint.

Further information can be obtained from B3 Services – Trading Support or from Trading Services by telephone on +55 11 2565-5021/5022 or by email at tradingsupport@b3.com.br and trading@b3.com.br.
